

BCA strata define the clinical comparison axis

The groups are ordered by reported B-cell aplasia duration; they are not a fitted continuous curve.

REPORTED DURATION / MONTHS

COHORT FACTS USED IN LATER COMPARISONS

GROUP	BCA-L	BCA-O	BCA3	BCA2	BCA1
Median duration	101 mo	61 mo	18 mo	4 mo	1 mo
Cohort size	n=5	n=11	n=11	n=38	n=17
Relapse observed	No	No	Yes	Yes	Yes

Clinical role stratify the atlas before molecular comparison

LONGEST BCA-L: no relapse
observed
SHORTEST BCA1: relapse observed

NEXT QUESTION What molecular program distinguishes the longest-remission state?
